PROFILE

I am a final-year Computer Science undergraduate at the University of Jaffna with hands-on experience in full-stack web application development. Through academic projects, I have developed strong analytical, programming, and problem-solving skills with attention to detail. I am interested in building efficient and scalable software solutions and exploring modern technologies, particularly in cloud computing. I am seeking a Software Engineering Internship where I can apply my skills and contribute to developing reliable software solutions.

EDUCATION

University of Jaffna 2022 – Present
Bachelor of Science (Hons) in Computer Science
Current GPA - 3.63 / 4.00

Ferguson High School, Rathnapura. 2020
Advanced Level Studies

PROJECTS

E-Commerce Platform for Optical Shop (React, Node.js) 01/2025 – 10/2025
Role: Full Stack Developer , QA Engineer

- Developed an online shopping platform using **React and Node.js** for an eye care products business.
- Collaborated with developers to retest and validate fixes after bug resolution.

Examination Claim System (HTML, CSS, PHP, MySQL) 07/2024 – 10/2024
Role: Backend Developer

- Developed a web-based Examination Claim System for the Computer Science Department to streamline the submission and processing of examination-related claims.
- Implemented using **HTML, CSS, PHP, and MySQL**, enabling staff to submit claims for setting, moderating, and supervising exams.

React Native To-Do List App (React Native, JavaScript) 05/2024 – 07/2024
Role: Frontend Developer , UI/UX designer

- Developed a React Native to-do list app with task management features.
- Integrated backend storage for data persistence.

Web Application Deployment on AWS EC2
(AWS EC2, Node.js)
Role: Cloud, Backend Developer

- Deployed a Node.js web application on an **Amazon EC2**.

- Tested the deployed application using the EC2 public IP.
- Gained practical experience in basic cloud deployment, server configuration, and backend hosting.

Serverless API Development with AWS Lambda (Node.js, JavaScript, AWS SAM, AWS Lambda)

Role: Cloud, Backend Developer

- Developed a serverless **REST API** using **AWS Lambda** with **Node.js**.
- Used **AWS SAM** to build and manage the serverless application.
- Implemented API endpoints and request handling logic for processing HTTP requests.

Ongoing Research Project (Individual)

Conducting research on **IoT-based health monitoring and anomaly detection**, leveraging real-time physiological data to identify and predict abnormal health patterns.

TECHNICAL SKILLS

Programming — Java, Python, JavaScript, PHP

Web Development — React, Node.js, HTML, CSS

Database Management — MySQL, MongoDB

Version Control — Git, GitHub

Cloud & DevOps — AWS (Basics), Docker

Software Testing — Unit Testing, Debugging

SOFT SKILLS

- Problem-Solving
- Teamwork & Collaboration
- Time Management
- Leadership & Project management

LANGUAGES

- **English** (Advanced)
- **Sinhala** (Fluent)

VOLUNTEER WORK

- Secretary, IEEE Student Branch, UoJ (02/2025 - 01/2026)
- Treasurer, IEEE Computer Society Student Branch Chapter, UoJ (02/2025 - 01/2026)
